5 reasons WHY BettaClean is a BETTER Option for your customers:

- 1** BETTACLEAN is the only spill kit currently available that will absorb the average liquid stomach volume, without having to use additional absorbent sachets!
- 2** It absorbs almost twice the volume of other readily available kits.
- 3** Disposable clean up tools provided are a large "responsible" size – it is easier for staff to avoid contact with hazardous waste.
- 4** It is up to 30% cheaper than alternatives AND it dries the floor properly!!
- 5** Unique Fibre-Lock™ Technology locks wetness and odour into hollow fibres.

Q Does mopping up spills create another problem?

A Yes, it introduces water to the surface, and until the surface is completely dry, there is always potential for slip injuries. Water can also spread any biological contamination onto more surfaces

Q Is there a way to dry clean the surface?

A Yes, Use BettaClean. It's 21st Century technology that dry cleans the surface (No water necessary). You will be amazed by BettaClean's performance and its ability to clean up a messy situation. It is now available in a large 20L pail and is ideal for areas where spills occur regularly.

BettaClean 20L Pail

- ▶ absorbs and removes all body fluids
- ▶ effective on all liquids
- ▶ eliminates odours
- ▶ doesn't release absorbed fluids – unlike other absorbents

Ideal for...

- ▶ Schools
 - canteens
 - class rooms and corridors
 - gymnasium
- ▶ Aged and day care centres
- ▶ Hospitals
- ▶ Kitchens
- ▶ Prisons
- ▶ Universities/TAFEs

Where can I get BettaClean 20L pail from?
