DrySorb Granules

An effective oil and liquid absorbent using a granular, inert Australian clay. It is safe, hygienic, economical, and has many applications.

Features

- Ideal for oil or water spills
- Reduces odour
- Economical – in a 20kg bag (compares favourably against zeolite)
- 4x more absorbent than some mineral products
- Granular- will not blow away easily
- Non flammable
- Screening process significantly reduces dust

Typical Industry Users

- **MINING**
oil and hydrocarbon spills in workshops and mine areas
- **TRANSPORT**
oil and hydrocarbon spills, both in workshops and “out on the road”
- **PAINT INDUSTRY**
will absorb paint, solvents, oil and varnish
- **LIFT WELLS**
absorbs oil and grease spills/excess
- **PACKAGING**
use as packaging medium to transport liquids
