

Don't risk it: Here's the easiest way to always get it right

The best way to be able to offer the right, quality spill solutions to your customers is by educating yourself and asking your customer questions about their specific needs.

- What fluids do you have onsite?
- How much?
- How big is your worksite?
- Do you have drains?

Once you've got all this information, you're in a good position to make an informed product suggestion. Because remembering them all can be hard, we've made it easy with this chart:

	 WATER-BASED CHEMICALS	 FUEL & OIL	 HAZARDOUS CHEMICALS
What type of spill do you have?	Floor Sweep Universal Pads Universal Socks Gloves	Floor Sweep Oil Pads Oil Socks Gloves	Hazchem Pads Hazchem Socks Hazchem Pillows Gloves Safety Glasses Coveralls
