

Our Commitment To Sustainability

Our range of Australian made environmental protection solutions

The Enretech Difference

Globally, organisations both large and small, are recognising the need to address sustainability. And not just in their products and services, but throughout all levels of their supply chain - from sourcing and procurement through to the factory floor and beyond.

Enretech understands and has been addressing the need for stronger business-wide sustainability for over 20 years. As an Australian-based manufacturer, we are a pioneer in the **environmental protection** sector. With a commitment to innovation, we have drawn on many years of experience and research to develop and refine our completely organic, 100% biodegradable, non-toxic spill and soil remediation solutions for industry and related services.

Unlike largely imported 'poly' and 'kitty' litter products, our leading **spill management** products and **bioremediation** solutions are home-grown, made from responsibly sourced, recycled cotton waste and sourced from Australian farms. Our natural, organic products are designed to perform to the highest standards in terms of ease of use, absorbency and biodegradability. And the proof is there – our flagship product, Kleen Sweep, remains the #1 absorbent for hard surfaces.

Industries are realising that there no longer needs to be a trade-off between efficacy and sustainability. In this brochure you'll discover Enretech's range of eco-friendly products and their benefits, showing **sustainability without compromise** is a now real and valuable option for your business.

Eco-friendly

Our sorbent treatment technologies are made using only organic materials – primarily cotton and recycled cellulose.

Safe

Our sorbents contain no hazardous or toxic materials and are safe to use without requiring special equipment or training.

Biodegradable

Our organic range of absorbents do not leach, are 100% biodegradable and disposable in landfill (EPA dependant).

Cost-effective

Our highly effective and highly absorbent products minimise downtime spent cleaning and required product needed to resolve spills.

Australian-made

We are a wholly Australian-owned company who manufacture our range of environmental solutions in NSW, and have been for 20+ years.

Tested

Tested extensively as per USEPA, USDA, ASTM, CGSB and ISO, and meet or exceed international, Australian EPA, and Worksafe requirements.

Our Commitment To Sustainability

Our best-selling products from our environmental protection range

Product number	Size	Image	Product name	Product description	Sustainable criteria
Remediation products					
ENR010 ENR011	10kg bag 20L pail		Remediator	Remediator is a soil decontaminant that has been charged with oil-degrading, naturally-occurring and supplementary micro-organisms. It contains all of the necessary components for rapid breakdown of hydrocarbon contaminants.	90% made from recycled cellulose (cotton)
Industrial absorbents					
ENR020 ENR021 ENR022	10KG bag 20L pail 5KG bag		Absorbent Kleen Sweep	Kleen Sweep is a multi-purpose particulate absorbent made from renewable natural by-products, absorbs up to 10x more than other available products, and is 100% biodegradable	90% made from recycled cellulose (cotton)
ENR025	10KG bag		Absorbent Xtrasorb (cellusorb)	Xtrasorb is a cellulose oil & fuel absorbent for use on water. It is completely biodegradable and will absorb up to 19x its own weight in oil based products - even when wet.	90% made from recycled cellulose (cotton)
Booms, socks & pillows					
ENR035	35CM sq (5)		Absorbent pillow	The Universal Pillows is an environmentally-friendly alternative designed for use on all hard surfaces to absorb and contain spills of a wide range of water-based liquids.	80% made from cellulose
ENR036 ENR040 ENR041 ENR043	1.2M x 10CM 1.2M x 10CM 2.4M x 10CM 3M x 10CM		Absorbent socks	The Enretech Sock is an environmentally friendly alternative to polypropylene products, designed for spill containment and absorption, especially for ongoing spill prone areas.	80% made from cellulose
ENR121	1000ML sach (20)		Absorbent infect waste	Enretech BettaClean is a powerful organic absorbent powder that quickly absorbs human or animal waste and bodily fluids.	90% made from cellulose (cotton)
Spill response kits					
<ul style="list-style-type: none"> · We have over 20 spill kits within our range. Please contact the Enretech team if you require a full list · You can easily and efficiently replenish your spill kit via Enretech's online audit and refill tool via the QR code on your kit · We also provide a range of spill containment solutions sold under the Enretech Plus brand 					
ENR091			Transport Spill Kit (small)	The Transport Spill Kit is a compact solution designed for service vehicles, transport trucks, small workshops or any location where storage space is at a minimum. It is suitable for containing and cleaning up any fuel or oil based liquids.	90% of absorbents within the spill kits are made from recycled cellulose (cotton). Spill kit bins and gloves are not bio-degradable.
ENR100			Service Station Spill Kit	The Service Station Spill Kit is designed for petrol stations, depots, workshops, and warehouses, to contain and clean up hydrocarbon spills.	<p>Scan me!</p> 
ENR089			Universal Spill Kit	Able to contain and clean up both oil and water-based liquid spills, the Universal Spill Kit is designed to be used by any business that has identified risks due to spill liquids.
