

Kleen Sweep™

The world's best organic absorbent on hard surfaces

Globally recognised

Kleen Sweep is a highly effective organic absorbent used to clean up spills on all hard surfaces. Made from recycled cotton waste and sourced from Australian farms, Kleen Sweep has been proven to outperform all its competitors - earning the brand the status of the #1 hard surface absorbent globally.

The Kleen Sweep difference

Highly-absorbent

Absorbs 10x more liquid than non-organic products

Sustainable

Made from recycled cotton waste

100% Bio-degradable

Disposable in most landfills

Fibre-lock technology

Prevents leaching of spilled liquids

Cost-effective

Requires less product to clean spill

Safe

Non-toxic, dries clean & leaves no residue

“ *Kleen Sweep is far and away the best product I've ever used.. And I've been working as a firey for over twenty years...there's just nothing that compares to it – it's just that far ahead.* ”

– Member of the Victorian Metropolitan Fire Service

Application

Kleen Sweep is designed for use on all hard surfaces to absorb oil and water-based spills. The product is simply spread around and over the spill, and swept back and forth until the surface is dry. The sorbent is then swept aside leaving no surface residue. No secondary detergent or solvent washes are necessary.

Easy steps to a clean surface

Industries

Kleen Sweep is both Government and Industry accredited and is currently in use across hundreds of industry sectors locally and internationally:

- Roads and Emergency Services
- Petrol Stations
- Automotive
- Mining, Oil and Gas
- Supermarkets and retail
- Hospitals and Schools
- Commercial Food Service
- Light and Heavy manufacturing

About Enretech

Enretech and Novorem make up the Enretech Environmental Solutions Group. For over twenty-five years - decades ahead of the global movement towards sustainability - Enretech has pioneered the use of environmentally sound products to combat some of the world's most common eco-hazards such as industrial spills, soil and ground water contamination. Our range of spill solutions and soil remediation products are completely organic, 100% biodegradable and Australian-made.

A firm commitment to the Environment remains core to the Enretech Group ethos and we will continue to deliver Sustainability without compromise for our distribution partners and users of our products alike.
